

Is your inventory disorganized, obsolete, or overloaded? Are you challenged with running out of inventory, requiring staff to leave the building to purchase products?

## Introducing **STOCKWISE** inventory management solutions for plumbing maintenance.

From free organizational tools to full-service inventory management programs, our solutions allow you to:

- Increase staff productivity
- Keep staff on-site
- Improve the image of your facility
- Reduce costs through better inventory accountability

Programs can be customized to fit your facility's specific needs.

ORGANIZE

### Product Identification

Work with your SupplyWorks Account Executive or visit our website to determine the most important products for your stocking locations, including stockrooms and warehouses. This is the first step toward maintaining the right product mix and building your just-in-time inventory replenishment plan strategy.

### Bin Labels

Organize your inventory and easily access products with our online Bin Labels tool. Each color-coded label includes the product's part number, description, image, and barcode for quick and intuitive identification.

MANAGE

### Shop Management Program (SMP)

For any size customer who is looking to improve their inventory efficiencies through organization and technology. Special racks and bin boxes help you control your stocked products.

REPLENISH

### Mobile App with Scanning Feature

Our free mobile app includes convenient features of our mobile website, plus it enables you to quickly order items by scanning product barcodes on your bin labels or UPC codes on product packaging—all without specialized equipment.

### Supplyware®

Accelerate your inventory check-in and checkout process with our comprehensive inventory management system. Supplyware manages inventory min/max levels, provides real-time visibility to your stock levels and usage, and automates ordering and replenishment.
